

TEXTUREWALL™ PANEL WALL SYSTEM

Add a classic stucco appearance with lasting durability and enhanced efficiency.

The classic beauty of stucco. The enhanced performance of a Butler® building system. You can add this attractive combination of benefits with the TextureWall™ panel wall system. The textured look of this system makes it particularly ideal in instances where local building ordinances require a masonry or stucco exterior.

Choose the TextureWall system to add the beauty of stucco in applications such as retail centers, churches, recreational and community facilities, and more.

CREATE CLASSIC BEAUTY

The exterior face of the TextureWall system features the Texture-Cote™ finish system—a hard aggregate-fiber-reinforced polymer finish that creates its characteristic stucco appearance. The metal interior face is finished in an attractive, virtually flat finish with a polyester white color that is USDA approved. This can act as a finished interior wall or can be used for the application of other wall materials.

CUSTOMIZE THE LOOK

The rich textured surface of the Texture-Cote finish system is available in four attractive color options. Each is designed to complement other building materials, including Butler wall and roof systems. And with its 42-inch panel width, the TextureWall system creates a stunning monolithic stucco appearance.

Aspen White II

Adobe II

White II

Gray II

Note: Colors shown may vary from actual samples due to variations in the printing process. Colors and color availability subject to change without notice.

ASSURE LASTING DURABILITY

The TextureWall system's durable surface resists the effects of impact, abrasion, and harsh weather. And unlike field-applied finishes that are vulnerable to damp or cold weather during installation, TextureWall panels can be erected in virtually any weather condition.

BUILT-IN ENERGY EFFICIENCY

The TextureWall system's factory-installed foam core insulation and thermal break joint design

deliver excellent energy efficiency, with an R-value from 15 to 32 depending on panel thickness. The factory-applied joint sealant provides a complete wall system weather barrier. Panels are offered in 2- to 4-inch thicknesses.

FAST INSTALLATION

Installation of the Texture-Cote system can be performed from the exterior of the building, which saves time and money.

COMPARE OUR WARRANTY

While many field-applied systems offer a prorated 5-year warranty on the coating material only, Butler stands behind the Texture-Cote finish system with a full 10-year warranty on material and application.

TEXTUREWALL™ PANEL WALL SYSTEM

PANEL-TO-STRUCTURE ATTACHMENT

Concealed clip provides easy exterior installation and clean look

Thermal break joint to enhance energy efficiency

The classic textured look of stucco, with a 10-year finish warranty

Four attractive colors

KEY BENEFITS

- ✓ The classic textured look of stucco satisfies many local building codes requiring masonry or stucco exteriors
- ✓ 10-year finish warranty
- ✓ Can be erected in virtually all weather conditions
- ✓ Foam core insulation and thermal break joint enhance energy efficiency
- ✓ Attractive interior metal panel provides finished look without the need for additional materials
- ✓ The added durability of the Texture-Cote™ finish system
- ✓ Four attractive colors
- ✓ Wide 42" panels create a monolithic appearance

BUTLER OFFERS YOU MORE

Butler Builders provide complete construction services with single-source responsibility

- Reputable professionals with extensive knowledge of local building codes

Maximize your building's performance with a complete Butler® system solution

- Innovative structural, wall, and roof systems
- Precision engineered for seamless integration
